

How to install handrail covers

How to install handrail covers?

The steps to installing a handrail cover have never been easier. It does not matter whether you are a contractor or a DIY enthusiast, with the right tools and a little time, you will easily be able to install our handrails, no problem!

Items needed:

- Measuring Tape
- Pencil
- Paper
- Table Saw

Step 1: Measure to length

An essential part of this process is making sure you have proper measurements. Using your favourite measuring tape, measure each length of handrail and write down the dimensions.

Step 2: Cut to size

Before you cut all the sizes you have marked down, try starting with one, small section first. You will want to lodge an end piece of the wood railing into the underside section of the **vinyl handrail cover**. Doing this will ensure a proper, stable cut with your table saw. Once you have completed one section and double-checked the dimensions were correct, continue onto the next section.

Step 3: Installation

Now that the measurements are done, the cutting is complete, and you have checked one piece to ensure the measurements are correct, you can start installing. Thanks to our friction fit system, there are no nails or screws involved. Simply set the handrail cover into place and apply pressure so it snaps onto the wood. Once all the lengths are in place you can go around and add end caps, connectors, and corner caps to complete the cover.

Thanks to our rib system there will always be airflow inside the handrail cover so the wood will not rot or succumb to the elements. Plus, if that was not good enough, there is little to no maintenance to our products! The vinyl handrail will never fade in the sun, warp with the changing seasons, or need a new coat of paint. Now that your handrail cover has been applied you can sit back, relax, and enjoy the beautiful new addition to your home!

The Perfect Ventilation Accessories For Your Home

The Perfect Ventilation Accessories For Your Home

All homes will need ventilation accessories, it is not only required by building law but it makes for living in your home a lot more comfortable. However, all homes will require their own styles and functions. Living in the Greater Vancouver area of British Columbia is a lot different than living in Phoenix,

Arizona. What your home requires in Vancouver will not be the same as the requirements of Phoenix.

That being said, there are many ventilation accessories available, some of which will be highlighted here. These can include several different areas of your home. If you have a basement, it will need a vent. If you have a ground floor, it will need vents. And if you have an attic, it will also need to be properly ventilated.

For basements, you will want to check out the . It is an excellent addition to any home. The 401 Basement Vent is a surface mounting wall vent, which is ideal for stucco or siding application. Basements are known to get a little moldy, especially if they are partially underground. To ensure your basement remains properly ventilated, you will need the 401 Basement Vent.

For ground level, there are plenty of things already going on. It is often the busiest area of the home. Of course, that does not mean it does not need ventilation. The 301 Wall Vent is perfect for ground level. It is designed for fresh air intake for gas furnace, hot water tank, heaters, air conditioning, and more.

For the attic, there are plenty of choices of beautiful gable vents available here at VSA Enterprises. These include everything from the basic shapes of circles and rectangles to more stylish designs such as octagon gable vents and cathedral gable vents. There are plenty of other designs available in our shop as well. Have a look and see what would make for a wonderful addition to your home!

Small Gable Vents and How They Spice Up Your Home

Small Gable Vents and How They Spice Up Your Home

A home requires accessories and a great place to start with accessories is small gable vents. They are functional, stylish, and add a little extra character that your home. Whether that is a triangle gable vent, octagon gable vent, decorative gable vent, rectangular gable vent, or square gable vent, your home will be pleased with the addition.

You can get small gable vents for sheds or small gable vents for your home. Whatever you choose, they will help circulate the air in your home. In winter, they keep the area cool so it repels pests and ensures mold cannot survive, and in summer they help regulate the air temperature.

How are they applied?

Gable vents, for the most part, are easily applied to any number of materials including brick, wood, vinyl, hardy board, or aluminium. The best products on the market will include level lines to assist in the installation of the gable vent. If you are a handy person, you can probably install the gable vent yourself, but if you do not know what you are doing, you will definitely want to call a contractor or a friend with the skills necessary for the job.

What types of material are they

made from?

Gable vents come in a variety of materials available on the market. Some of these include PVC gable vents, wood gable vents, urethane gable vents, aluminium gable vents, or vinyl gable vents. Different materials serve different purposes, and it is important to do your research or call a professional before making a decision. You will want the most suitable design and the most suitable materials to match the aesthetics of your home and give it that extra character it wants!

Here at VCA Enterprises we have all your ventilation accessory needs under control! From the beautiful and basic round gable vent to the stylish and eloquent cathedral gable vent, you will raise the value of your home as well as add some extra flare and function thanks to our state of the art designs!

Deck Railing Covers

Deck Railing Covers

Discover deck railing covers that put your mind at ease with VSA Enterprises.

You have just bought or built a new home and everything's fresh. You love what is inside and love what is outside as well. Yet when you step out of your door and look at the pristine, unmarred, smooth deck railing of your backyard or patio, an unbearable dread rises up inside of you. You are not sure what the source of this is at first, seeing as how it has hit you so hard and on such a glorious day as this, when

everything that you think about should be happy and carefree. But you realize it soon, if not after a few seconds, then after a minute.

You realize that if you leave that deck railing as it is, naked to the elements and the countless people that will touch it, it will not stay a pristine, unmarred wonder of your architecture, but becomes stained, cracked, and weathered. You did not come into this home just to see it rot, and that is why deck railing covers such as those that **VSA Enterprises** offers are the perfect product to put your mind at ease and put the joy back into this most joyful of days. Now you can rest easy knowing that there is protection for your deck railing with covers that are durable and aesthetically-pleasing to even the most critical eyes. Now you can live your life with the happiness that comes from deck railing covers good enough to keep your home as beautiful as it can be, [check this site out](#).

2×6 Deck Handrail

2 X 6 Deck Handrail

A perfect fit with VSA's 2×6 deck handrail cover.

Handrails are the perfect fixture for any home. They exude elegance with their sleek exteriors that reject rain and other elements of nature, handrail exude class with the care that

only those who know the importance of adding style to any environment can appreciate. Handrail cover exude practicality with durable material that can stand the wear and tear of time and the many parties you are sure to throw.

When guests come to your home, do you want them to be greeted by the harsh grain of a wooden handrail, or a perfect 2x6 handrail cover that forms a snug barrier between your wood and their palms?

The functionality of a 2x6 handrail cover will allow you to get as many as you need to cover as much surface as people can reach. By extending the handrail cover to encompass your entire deck, you will be able to transform your space into one that everyone can let loose on.

This way, you will know that even if someone spills some beer on your railing, even if there's a torrential rain that threatens to flood your floor, your handrails will lay easy and protected with a patented ribbing system that will keep moisture damage out and structural integrity in.

Products such as VSA Enterprises' 2x6 deck handrail are made to endure any climate, any rainfall, all the time. After all, what works in BC's coastal rainforest, which is filled with months upon months of mold-loving weather, can work virtually anywhere else.
